WORK EXPERIENCE

·Caxy Code Creative- Chicago, IL (October 2014- Present)

- Front-End Web Developer
- Provided front-end development, CSS, HTML, PHP, jQuery, and Bootstrap technologies to develop WordPress, Drupal, or custom coded websites.
- Participated in Agile process to ensure our development goals could be delivered to client within the scope of the project.
- Worked with an internal team to begin Drupal Certification training through projects and courses.

·Perfect Search Media- Chicago, IL (May 2014- October 2014)

- Web Developer
- Served as the main in-house developer for the company, developing WordPress-based sites from existing Photoshop mockups and wireframes, while using CSS and HTML as primary coding languages for building and designing the sites.
- Worked with clients to ensure their ideas and visions for the site were implemented throughout the development process.

· The Nimblestar Group, Inc- Orland Park, IL (April 2014- August 2014)

- Web Developer
- Hired to develop a website for the company using WordPress and Hubspot CMS.
- Used CSS and HTML to take an existing theme bundle and tweak it to serve the company's needs and overall goals.
- Worked with a designer to plan the layout and features of the site in order to ensure a user-friendly experience.

·Keller Williams- Park Ridge, IL (January 2014- May 2014)

- Web Development Intern
- Assisted employees with the development of their websites through WordPress development and design.
- Acted as a consultant for questions related to web development including hosting and domain setup and services.
- Increased the online presence of the company through Google SEO and internal marketing strategy.

·Fitness 4 Change – Romeoville, IL (October 2013- June 2014)

- Web Designer and Developer
- Duties included designing and developing a website using WordPress and an existing theme template to custom style to the needs of the organization using CSS, HTML, PHP as well as implementing child themes.
- Worked on backend maintenance and updates of the site to ensure proper web security and loading times.
